

meet the Young family

Deontasja is mother to Kaleigha (2) and Kalani (1). She works as a Licensed Practical Nurse with Beech Grove Meadows.

“ Homeownership will mean the world to my family and me. It would be one of the greatest accomplishments I could ever dream of. Currently we are living in a two-bedroom, one bathroom apartment that we are grateful to have. But to be able to own a home with the space and room we desire would be amazing.

Growing up we moved around a lot, so we never really had a stable home to create memories. I have a lot of goals set in place for my new home. I want to organize and design our home so we can live comfortably in our own space. I also want to decorate for the holidays and start a measuring chart on the wall to capture the kid's growth over the years.

We want to plant flowers, grow a beautiful garden and create years of precious memories with my family. I am now in nursing school. Becoming a nurse and owning a home will be great accomplishments. ”

"I believe Habitat for Humanity will help me thrive on my journey in creating the best life possible for my family."
