

# meet the Carter family

---

**Kionye' is mother to 2-year-old Kimari and works as a Customer Care Representative at Lowes Home Improvement. They attend Eastern Star Church.**

"I heard about Habitat from my mother, who is currently in the program. She persuaded me to start the process. She knew that this opportunity would allow me to always have a place to call home. I would love to become a Habitat for Humanity homeowner, to build a stable home for my child. I would like to grow and make this a family home.

My goals are to make this a safe haven and allow my son to grow in this home. I am looking forward to building and adding new things for a brand-new start. This would be my first home so it would allow me to build my credit and help me achieve one of my goals. The first thing I will do when I move in is bless the home and decorate."

*"This would allow me to understand the importance of being responsible and learning in adulthood."*
