

meet the Ervin family

Lisa is an optician at Kauffman Eyecare. She is a mother of four and a grandmother of two (soon to be three!)

“ There were hard times that my children and I had to experience. I have rented from landlords since my children were babies. Landlords would sell their properties which made us to have to find housing. That is one of the most stressful situations that a family encounters. Just recently, I was told that our current apartment could once again change. Always having homeownership as a priority and future goal, I am ready to take the next step.

Once I become a homeowner, we won't have to move anymore and will be free of any hardships. I could help raise my grandchildren in a stable environment. I could invest in myself and my family. Homeownership would be my responsibility, and I could decorate as I saw fit. There won't be any more dos and don'ts for a property that isn't mine. Homeownership is about investing, building wealth, having a secure foundation, and creating many memories. ”

"Homeownership means having an asset, long-term commitment, and stability for my family."
